IT'S ELECTRIFYING

Introducing the Siromer Lightning

2020 saw SIROMER welcome a new tractor ready to take on any challenge. Championing a dual stage clutch and double acting spool valves, lightning really does strike twice.

For customers who don't need a larger framed model but need the most amount of power, productivity, versatility and efficiency one compact package can offer.

At just a metre wide this small but mighty tractor is powered by a 35hp engine. The perfect size to nimbly manoeuvre in the tight quarters that many smallholders and groundsmen work with but not compromising on strength and durability. There is a choice of turf or agricultural tyres for this powerful workhorse including wider 13.5-inch agricultural tyres.

At Siromer we are thrilled to introduce this more compact, lightweight but powerful tractor that meets all Siromer's practical requirements; a dual stage clutch is an absolute must for any compact tractor, 8+8 shuttle, power steering and 4wd.
