

SIROMER Equipment

Your Tractor's Best Friend

DISC MOWER

Primarily used for cutting grass for hay making.

When you need maximum hay cutting production, Siromer disc mowers are your best option. With these machines you can go from transport to cutting literally in seconds. They are rated to cut at speeds of over 10 miles per hour.

The disc mower design also provides more adjustability in cutting height than other mower designs. For those wishing to leave longer stubble behind after cutting, it may be a better option than a drum mower.

MODEL	Working Width	Weight	Discs
