SIROMER

FLAIL COLLECTOR

M90

Cut it. Collect it. All in one pass.

The Siromer Flail Collector is designed to cut, shred and collect grass in a single pass, helping you save time and leave a cleaner finish. Heavy-duty flails mounted on a rotating drum cut and mulch the material into fine clippings, before sweeping it into the onboard collector. This makes it ideal for customers who want the cutting action of a flail mower, but without leaving cut grass behind.

FEATURES:

- Cuts, shreds and collects in one pass
- Heavy-duty flails mounted on a rotating drum
- Onboard collector reduces clearing up after mowing
- Leaves a neat, tidy finish
- Suitable for lawns, paddocks, parks, estates and public spaces
- Helps reduce time and labour on larger grass areas
- Available in multiple sizes and setups to suit different tractors and jobs
