Your Tractor's Best Friend

SIROMER HYDRAULIC BOX

Unique design enables the collection and transportation of material without the need for a back door. Siromer's hydraulic tipping back boxes have a tilt angle of 92 degrees downwards for easy loading and unloading. Available in 2 sizes 1.3m and 1.5m both three point linkage mounted CAT I. Internal reinforcing shoes tie the strength of the floor to the cross beams on the back of the box creating a solid back plate to absorb the force of high horse power tractors. Smooth rounded edges for easy unloading and cleaning. Heavy duty Double acting ram. Reinforced floor. Reinforced nose plate. Heavy duty structural box section hitch with reinforced joints for extra strength. The 5mm thick folded form of the box has 2 internal reinforcing beams across the back of the body of the box eliminating any flexing when the box is under heavy load. The heel of the box is fitted with a scraping blade, supported by the floor skids further adding reinforcing strength to the back of the box and giving the capability of grading and levelling stones, sand, soil ,etc

The 1.3m tipping box weighs 190kgs and is suitable for 25-50hp tractors.

The 1.5m tipping box weighs 210kgs and is suitable for 35-75hp tractors.
