SIROMER STONE BURIER WITH SEEDER

The Siromer stone burier cultivates, buries stones, levels to prepare the perfect bed. The stones, clods, old turf and debris are centrifugally separated out and thrown to the bottom of the soil profile. A screen gradually releases the renovated material with the finest soil at the top, this then passes under the mesh roller which gently levels off the soil leaving a bed perfect for seeding.

With the addition of a seeder, mounted between the screen and the roller, seeds are dropped at the selected rate before being compressed into the ground, allowing the user to prepare and plant all in one pass. Complete with shear pin PTO shaft.

| Model | SIZE | STRUCTURE WEIGHT | TILLING WIDTH | TILLING DEPTH | No. Blades | PTO SPEED | POWER REQUIRED | Box Capacity |
|-------|-------|------------------|---------------|---------------|------------|-----------|----------------|--------------|
| S64S | 1.25m | 452kg | 1150mm | 120mm | 24 | 540 r/min | 20-40 hp | 100lt |
| S65S | 1.45m | 483kg | 1350mm | 120mm | 28 | 540 r/min | 40-75 hp | 125ltr |
