

SIROMER

HAY RAKE

One machine. Two jobs. Clean, fast results.

The Siromer hay rake doubles as a tedder—perfect for rowing up before baling or spreading fresh-cut grass to speed up drying. Vertical tines reduce debris for cleaner tedding and raking. A convenient jack simplifies three-point hitching, and a PTO shaft is included.

RAKE FEATURES

- Precise raking action for fluffy, uniform windrows
- Self-centring wheels for sharp turns and reversing without lifting
- Strong frame with adjustable wheel height for different conditions
- Cleaner raking with vertical tines
- Quick and easy 3-point hitch setup

TEDDER FEATURES:

- Spreads swath or windrow for faster drying
- Adjustable tine position and PTO speed for crop type
- Fixed tines for aggressive tedding in fresh-cut grass
- Cam-operated tines for gentle crop handling and leaf retention

Model	Tedding Width	Weight	Tines per Rotor	No. of Rotors	Working Speed	Power Required
P30	2500mm	160kg	4	6	4-8 km/h	20-40hp
