SIROMER LIGHT FLAIL MOWER

The Siromer Flail Mower is designed for very light grass cutting in fields or parks. Fixed semi offset by approximately 6 inches, complete with a support leg for storage. Fitted with horizontally revolving Y-flail blades. The adjustable rear roller maintains height above the ground allowing the flail mower to be used on both a smooth lawn and uneven grass verge. The cutting height is controlled by adjustable skids. Compact size allows good manoeuvrability making the flail mower ideal for restricted access.

| Model | Size | Working Width | Weight kg | Power | Flails | Offset |
|-------|-------|---------------|-----------|---------|--------|-------------|
| M42 | 1.05m | 1029mm | 140 | 16-20hp | 36 | Semi-offset |
| M44 | 1.25m | 1229mm | 170 | 18-25hp | 42 | Semi-offset |
| M45 | 1.45m | 1429mm | 200 | 20-30hp | 48 | Semi-offset |
