HAY RAKE

Jarmet 4.4m Single Rotor Rake

Working width of 4.4m, transport width 1.7m

It has 11 arms each with 4 double fingers which are 9mm thick.

Complete with a steering headstock meaning the headstock is rigid when in transport mode and when in work has dampeners which enable turning.

Tandem axles, the 4 wheels are on individual rockers and are adjustable for left hand pick up height.

Tine height from ground is easily adjusted by fool proof winder.

Running gear is robust and strong.

Horse power requirement is 45hp to 75hp.

Working speed is 540 rpm on the pto and forward speed 6-12 KM/H.
