

SIROMER

ROTOVATOR

Reliable seedbed prep made simple.

The Siromer Rotovator is built to break up worked soil and create a fine, even seedbed. With adjustable skids for depth control and a semi-offset design to cover wheel tracks, it's a dependable tool for paddocks, gardens and small fields. Ideal for preparing soil for grass, vegetables or crops. Reliable seedbed prep made simple.

FEATURES:

- Adjustable skids for precise dig depth
- Semi-offset to cover tractor wheel marks
- Heavy-duty oil-immersed gear drive
- Wide precision-ground spur gears
- Rear safety flap for a smooth finish
- Shear pin PTO shaft included
- Built-in prop stand for easy storage
