

SIROMER Equipment

Your Tractor's Best Friend

SIROMER PIPE LAYER

The Siromer pipe layer is ideal for use around smallholdings laying water pipe or armoured cable. The attachment benefits from being both quick and easy to use.

The S32 pipe layer is perfect for flexible pipe or cabling up to 70mm in size. The ripper can physically go down 24 inches but the achieved depth depends on the power of the tractor and soil type. Usual operating depth is 18 inches this depends on soil type and tractor size. Measurement from lower linkage to ripper foot 24 inches.

Maximum diameter of pipe or cable being laid depends on it's flexibility, please call for guidance if unsure.

The implement can be attached to the 3 point linkage of a range of small or compact tractors.

Recommended for tractors with 20-50 HP

Cat 1 three point linkage.
